PRENATAL HISTORY QUESTIONNAIRE

Having a healthy baby is a special event. Once a baby is born, families take certain precautions to ensure the baby's health and safety. The unborn child deserves similar care.

The following questions will help in the care of your pregnancy. Please answer these questions as well as you can. If you need help answering the questions, please ask your health care provider. The first questions relate to you. The next set of questions will be about you, your baby's father, and both your families. When thinking about your families, please include your child (or unborn baby), mother, father, sisters, brothers, grandparents, aunts, uncles, nieces, nephews, or cousins.

Yes No 5. Do either you or the baby's father have a birth defect or genetic condition such as a baby born an open spine (spina bifida), a heart defect, or Down Syndrome? Yes No 6. Does anyone in your family or anyone in the baby's father's family have a birth defect or con that has been diagnosed as genetic or inherited, such as open spine (spina bifida), a heart dor Down Syndrome? Yes No 7. Where your ancestors came from may sometimes give us important information about the hof your baby. Are you or the baby's father from any of the following ethnic/racial groups: Jew Black, Asian, Mediterranean (Greek, Italian)? Yes No 8. Have you or the baby's father ever been screened to see if either of you are carriers of the grown any of the following: Tay-Sachs, Sickle Cell, Thalassemia, or Cystic Fibrosis? Yes No 9. Do you think you are at increased risk of having a baby with a birth defect or genetic disorder [If yes, which defect or disorder?] Why do you think you are at increased risk?	Yes	No	1,	Will you be 35 years or older when the baby is due? Age when due:				
Yes No 4. Have you or the baby's father had a stillborn baby or a baby who died around the time of delifyes Yes No 5. Do either you or the baby's father have a birth defect or genetic condition such as a baby born an open spine (spina bifida), a heart defect, or Down Syndrome? Yes No 6. Does anyone in your family or anyone in the baby's father's family have a birth defect or con that has been diagnosed as genetic or inherited, such as open spine (spina bifida), a heart dor Down Syndrome? Yes No 7. Where your ancestors came from may sometimes give us important information about the hof your baby. Are you or the baby's father from any of the following ethnic/racial groups: Jew Black, Asian, Mediterranean (Greek, Italian)? Yes No 8. Have you or the baby's father ever been screened to see if either of you are carriers of the groups of the following: Tay-Sachs, Sickle Cell, Thalassemia, or Cystic Fibrosis? Yes No 9. Do you think you are at increased risk of having a baby with a birth defect or genetic disorder [If yes, which defect or disorder?] Why do you think you are at increased risk? Yes No 10. At any time during the first two months of your pregnancy, have you had a rash or a fever of 103° F or greater? Sometimes, the unborn baby can be exposed to outside factors that can cause birth defects. The next 8 question give us important information about possible exposure to the baby. Yes No 11. Have you had any x-rays during this pregnancy?	Yes	No	2.	Are you and the baby's father related to each other (i.e. cousins)?				
Yes No 5. Do either you or the baby's father have a birth defect or genetic condition such as a baby born an open spine (spina bifida), a heart defect, or Down Syndrome? Yes No 6. Does anyone in your family or anyone in the baby's father's family have a birth defect or conthat has been diagnosed as genetic or inherited, such as open spine (spina bifida), a heart dor Down Syndrome? Yes No 7. Where your ancestors came from may sometimes give us important information about the hof your baby. Are you or the baby's father from any of the following ethnic/racial groups: Jew Black, Asian, Mediterranean (Greek, Italian)? Yes No 8. Have you or the baby's father ever been screened to see if either of you are carriers of the grown of the following: Tay-Sachs, Sickle Cell, Thalassemia, or Cystic Fibrosis? Yes No 9. Do you think you are at increased risk of having a baby with a birth defect or genetic disorder lf yes, which defect or disorder? Why do you think you are at increased risk? Yes No 10. At any time during the first two months of your pregnancy, have you had a rash or a fever of 103° F or greater? Sometimes, the unborn baby can be exposed to outside factors that can cause birth defects. The next 8 question give us important information about possible exposure to the baby. Yes No 11. Have you had any x-rays during this pregnancy? Yes No 12. Have you had any alcohol during this pregnancy? 13. Prior to your pregnancy, how often did you drink alcoholic beverages? □ Every day □ Less than once a month □ At least once a week, not daily □ I do not drink alcoholic beverages 14. Prior to your pregnancy, about how many alcoholic beverages did you usually have per occase (1 = one can of beer, one wine cooler, one glass of wine, or one shot of liquor) □ 3 or more □ 1 to 2	Yes	No	3,	Have you had three or more pregnancies that ended in miscarriage?				
an open spine (spina biffida), a heart defect, or Down Syndrome? Yes No 6. Does anyone in your family or anyone in the baby's father's family have a birth defect or con that has been diagnosed as genetic or inherited, such as open spine (spina biffida), a heart door Down Syndrome? Yes No 7. Where your ancestors came from may sometimes give us important information about the hof your baby. Are you or the baby's father from any of the following ethnic/racial groups: Jew Black, Asian, Mediterranean (Greek, Italian)? Yes No 8. Have you or the baby's father ever been screened to see if either of you are carriers of the group of the following: Tay-Sachs, Sickle Cell, Thalassemia, or Cystic Fibrosis? Yes No 9. Do you think you are at increased risk of having a baby with a birth defect or genetic disorder If yes, which defect or disorder? Why do you think you are at increased risk? Yes No 10. At any time during the first two months of your pregnancy, have you had a rash or a fever of 103° F or greater? Sometimes, the unborn baby can be exposed to outside factors that can cause birth defects. The next 8 question give us important information about possible exposure to the baby. Yes No 11. Have you had any x-rays during this pregnancy? Yes No 12. Have you had any alcohol during this pregnancy? 13. Prior to your pregnancy, how often did you drink alcoholic beverages? Every day	Yes	No	4.	Have you or the baby's father had a stillborn baby or a baby who died around the time of delivery?				
that has been diagnosed as genetic or inherited, such as open spine (spina bifida), a heart dor Down Syndrome? Yes No 7. Where your ancestors came from may sometimes give us important information about the hof your baby. Are you or the baby's father from any of the following ethnic/racial groups: Jew Black, Asian, Mediterranean (Greek, Italian)? Yes No 8. Have you or the baby's father ever been screened to see if either of you are carriers of the grown for any of the following: Tay-Sachs, Sickle Cell, Thalassemia, or Cystic Fibrosis? Yes No 9.
